Hand protection

By long-term hand contact: Tested protective gloves must be worn (EN ISO 374).

The quality of the protective gloves resistant to chemicals must be chosen as a function of the specific working place concentration and quantity of hazardous substances.

Suitable material: NBR (Nitrile rubber)

For special purposes, it is recommended to check the resistance to chemicals of the protective gloves mentioned above together with the supplier of these gloves.

Thickness of the glove material, Breakthrough times and swelling properties of the material must be taken into consideration. Replace when worn.

Skin protection

Wear suitable protective clothing. (dust-tight)

Respiratory protection

Respiratory protection necessary at: exceeding exposure limit values, insufficient ventilation, dust formation

Use appropriate respiratory protection. Full-/half-/quarter-face masks (EN 136/140), P1

Observe the wear time limits according GefStoffV in combination with the rules for using respiratory protection apparatus (BGR 190). The filter class must be suitable for the maximum contaminant concentration (gas/vapour/aerosol/particulates) that may arise when handling the product. If the concentration is exceeded, self-contained breathing apparatus must be used.
